01 · COMPANY

Who we are

Kramora AI is a senior-only AI agency. We embed experienced engineers — not juniors learning on your budget — to design, build, and run production AI systems. From Gen AI products to the data and cloud foundations underneath them, we take work from whiteboard to 24/7 operations.

5.0 average rating	**27+** teams supported	**97%** client retention	**2–3x** faster delivery
24/7 follow-the-sun delivery	**12** AI models in production	**4** data pipelines live	**+34%** model performance, last 24h

We reply within 24 hours.

Every inquiry is read and answered by a senior engineer — usually the same business day.

02 · SERVICES

Eight technical hubs

01

AI & Gen AI

Custom LLM applications, RAG systems, agents, and fine-tuning that ship to production.

02

Data Engineering

Pipelines, warehouses, and streaming foundations that keep models fed and fast.

03

Cloud & DevOps

Resilient infrastructure, CI/CD, and cost-optimized operations on AWS, GCP, and Azure.

04

Web & Mobile

High-performance web and mobile products built end to end on modern stacks.

05

Automation & RPA

Workflow automation that removes manual toil across your business.

06

OCR & Document AI

Extraction pipelines that turn unstructured documents into usable data.

07

Staff Augmentation

Senior engineers embedded in your team and ramped in days.

08

Blockchain & Emerging

Smart contracts, Web3 infrastructure, and disciplined early-stage tech bets.

Not sure where to start? We will help you pick the right hub in a free 30-minute call.

03 · PROCESS

How we work

1 **Discover** — WEEKS 1–2

Align on goals, audit data and systems, and define a roadmap with clear success metrics.

2 **Design** — WEEKS 3–4

Prototype the architecture, select the right models, and lock scope before a line of code is written.

3 **Build** — WEEKLY SPRINTS

Ship in weekly sprints with a working demo every week, so you see progress from day one.

4 **Scale** — 24/7

Harden, monitor, and optimize in production with follow-the-sun support as usage grows.

FLAGSHIP DEPLOYMENT

4.2k documents / hour

Insurance document pipeline — OCR, classification, and extraction — running in production, around the clock.

04 · ENGAGEMENT

Engagement models

Fixed Scope

- Clear deliverables and timeline
- Best for MVPs and audits
- Fixed price, no surprises

MOST POPULAR

Dedicated Pods

- Cross-functional senior pod
- Weekly sprints with demos
- Scale up or down anytime

Staff Augmentation

- Senior engineers in your team
- Ramped in days, not months
- Your process, your tools

Mix and match — most clients start with a Fixed Scope audit, then move to a Dedicated Pod.
